CURRICULUM HIGHLIGHT

Writer's Workshop:

Writing skills are built with consistent reinforcement and practice. This class will focus on building every writer as we work through the writing process!

Kitchen Lab (STEM):

Explore the key principles and practice of everyday science by using analogies, experiments, and research with food and drink in the kitchen environment. Let the kids discover the true scientist inside of them.

Public Speaking:

Choosing words wisely and using good tone are all crucial communication skills that students can learn even at a young age. This class will take a fun approach to addressing these skills through public speaking and presentation practice activities!

Round Table Discussion:

We seek to instill valuable characters in our students, such as kindness, resilience, responsibility, and gratitude- fundamental building blocks to faster an ethical and responsible mind-set.
